

Quality Control. Verified.

Inspections

Online inspections help ensure that we provide your company with high-quality service.

Tracking

Online reports organize and analyze your data, providing real-time solutions to business problems.

Communications

Open communication has never been easier! Client complaints are organized and distributed to those responsible as employee work orders.

Job Scheduling

Job schedules tie in directly with inspections and work orders.

Secure Clean - Award of Excellence Plaque Issued by Nissan Forklift, Inc

“ For Unsurpassed Customer Service, Product Innovation and Leadership in Maintenance Repair, and Operations. ”

CleanTelligent is web-based customer service and quality management tracking software.

With CleanTelligent, we perform on-site inspections using mobile devices (such as a PDA, Tablet PC or BlackBerry), track communication between employees and our clients, create job schedules, manage work orders, track inventory and much more.

Detailed graphical analysis allows us to monitor our performance to assure that services are completed as contracted and that you receive customer service that exceeds your expectations.
